Profile

Analytical Insight, Adaptive Learning, Creative Problem Solving, Leadership, Diverse Field Engagement

An ambitious and adaptive student, deeply immersed in the evolving field of Artificial Intelligence. With a proven track record in national arenas like the Robotics Olympiad competition, I demonstrate a high level of adequacy and innovative thinking. Securing excellence awards for three consecutive years further illustrates my commitment to achieving high standards. My two victories in spelling contests not only highlight my precision, but also shows my dedication to excellence in diverse fields. Apart from academic advancements, I have dived into the domain of retail gold selling, which consequently strengthened my communication skills and ability to negotiate.

Education
